Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/725,393

Applicant(s)

GUPTA, AJAY

Examiner

Jonathan ML Foreman

Art Unit

3736

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 May 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 4 - 14, 17 - 26, 28, 30 - 42, 44 - 51 and 53 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 4 - 14, 17 - 26, 28, 30 - 42, 44 - 51 and 53 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/25/07 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 4 – 14, 17 – 26, 28, 30 – 42, 44 – 51 and 53 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Throughout the originally filed specification, Applicant describes the apparatus functioning as a pager, beeper, or cellular phone. However, amended claims 1, 14, 26, 28, 42, 51 and 53 include the unsupported limitation “the device is operated as one or more of a cellular phone, pager, beeper, and other portable electronic communication device operative to transmit and/or receive data and/or voice signals”. The specification does not describe in a way as to reasonably convey to one skilled in the art that at the time the application was filed that Applicant had possession of other portable electronic communication devices.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3736

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 4 – 14, 17 – 26, 28, 30 – 42, 44 – 51 and 53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1, 14, 26, 28, 42, 51 and 53 include the limitation “the device is operated as one or more of a cellular phone, pager, beeper, and other portable electronic communication device operative to transmit and/or receive data and/or voice signals”. The claims are indefinite because it is unclear what is to be considered in the scope of “other portable electronic communication device”.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1, 4, 12, 14, 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,287,252 to Lugo.

In regard to claims 1, 4, 12, 14, 24 and 26, Lugo discloses a component for generating vibration, the component being adapted to generate vibration in response to a remote wireless signal when the device is operated as one or more of a cellular phone, pager, beeper, and other portable electronic communication device operative to transmit and/or receive data and/or voice signals, the component being further adapted to generate vibration for use in a medical diagnosis in response to

Art Unit: 3736

a signal generated by the device (Col. 9, lines 16 – 23). The apparatus is capable of functioning as a probe for detecting neuropathy in a subject. The probe can be used to determine a vibration perception threshold, a vibration disappearance threshold, or vibration threshold. It is well established that a recitation with respect to the manner in which an apparatus is intended to be employed, i.e., a functional limitation, does not impose any structural limitation upon the claimed apparatus which differentiates it from a prior art reference disclosing the structural limitations of the claim. *In re Pearson*, 494 F.2d 1399, 181 USPQ 641 (CCPA 1974); *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967); *In re Otto*, 312 F.2d 937, 136 USPQ 458 (CCPA 1963). Where the prior art reference is inherently capable of performing the function described in a functional limitation, such functional limitation does not define the claimed apparatus over such prior art reference, regardless of whether the prior art reference explicitly discusses such capacity for performing the recited function. *In re Ludtke*, 441 F.2d 660, 169 USPQ 563 (CCPA 1971). In addition, where there is reason to believe that such functional limitation may be an inherent characteristic of the prior art reference, Applicant is required to prove that the subject matter shown in the prior art reference does not possess the characteristic relied upon. *In re Spada*, 911 F.2d 705, 15 USPQ2d 1655 (Fed. Cir. 1990); *In re King*, 801 F.2d 1324, 1327, 231 USPQ 136, 138 (Fed. Cir. 1986); *In re Ludtke*, 441 F.2d 664, 169 USPQ 566 (CCPA 1971).

8. Claims 1, 4 - 14, 17 - 26 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Application No. 2003/0060765 to Campbell et al.

In regard to claims 1, 4 - 14, 17 - 26, Campbell et al. discloses combination electronic communication and medical diagnostic apparatus including a component for generating vibration, the component being adapted to generate vibration in response to a remote wireless signal when the device is operated as one or more of a cellular phone, pager, beeper, and other portable electronic

Art Unit: 3736

communication device operative to transmit and/or receive data and/or voice signals [0056][0058], the component being further adapted to generate vibration for use in a medical diagnosis in response to a signal generated by the device [0056]. The component generates vibration of a fixed magnitude or of a variable magnitude in a linear manner [0056]. The component generates vibration of a fixed frequency or of a variable frequency [0056]. The component generates a plurality of sets each of a fixed magnitude or frequency. When the apparatus is applied to a subject, threshold for the perception or disappearance of vibration can be determined as a measure of nerve function to detect neuropathy. The apparatus includes an audio or visual display (18). The device generates vibration in a first and second mode; one of the first and second modes is utilized in an electronic communication [0061] and the other [0056] is capable of being utilized in a medical diagnosis. A recitation with respect to the manner in which an apparatus is intended to be employed does not impose any structural limitation upon the claimed apparatus that differentiates it from a prior art reference disclosing the structural limitations of the claim. *In re Pearson*, 494 F.2d 1399, 181 USPQ 641 (CCPA 1947); *In re Yanush*, 477 F.2d 958, 177 USPQ 705 (CCPA 1973); *In re Finsterwalder*, 436 F.2d 1028, 168 USPQ 530 (CCPA 1971); *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967); *In re Otto*, 312 F.2d 937, 136 USPQ 458 (CCPA 1963); *Ex parte Masham*, 2 USPQ2d 1647 (BbPatApp & Inter 1987). It is noted that the device as disclosed by Campbell et al. generates a vibration that is capable of being used in a medical diagnosis.

Response to Arguments

9. Applicant's arguments filed 5/25/07 have been fully considered but they are not persuasive. Applicant asserts that Campbell et al. does not disclose a device that is operable as a portable electronic communication device operative to transmit and/or receive data signals. However, the device disclosed by Campbell et al. receives data wirelessly and acknowledges communication

Art Unit: 3736

[0056][0061]. Thus, the device operates at least as an "other portable electronic communication device". The device includes software that selects if the device vibrates in a first mode to acknowledge communication or a second mode in response to an alarm condition. Thus, Campbell et al. discloses a selector for selecting between a first and second mode.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan ML Foreman whose telephone number is (571)272-4724. The examiner can normally be reached on Monday - Friday 8:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571)272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
